

CL 807

Smoothing agent

Smoothing agent for flexible sealants

APPLICATION:

The smoothing agent is a ready-to-use product intended for sealed joints from polyurethane and silicone sealants. The smoothing agent is a new alternative for smoothing over joints, allowing subsequent repair of sealant after application.

COMPOSITION:

Preservatives (Benzyl alcohol, Bronopol, 3-Iodoprop-2-yn-1-yl-N-butylcarbamate).

PROCESSING:

The product can be sprayed directly over the surface of the applied sealant.

- Safe for silicones and sealants
- Ready-to-use
- Excellent agent for smoothing

Physical and chemical properties, and design	
Physical form	Liquid
Chemical base	Anionic surfactants
Density	1 g/cm ³
Colour	Transparent
Ph value	6.5 – 8.0
Silicone free	Yes
Min./max. processing temperature	0 to 40°C
Boiling point	100°C
Volume	750, 5000 ml
Design	PVC packaging

CAUTION:

- Before using this product, please read the instructions for use carefully, and follow the manufacturer's instructions.
- Avoid contact with eyes.
- Only completely emptied and clean packaging may be handed over to recycling.

FIRST AID:

After eye contact: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention. Dispose of contents/container according to local regulations.
